Full Stack Software Engineer | +91 7566573279 | guptaanshul2903@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Full Stack Software Engineer with 3 years of experience building **scalable, high-availability** enterprise applications on **Java (Spring Boot)**, **ReactJS**, **React Native**, **PostgreSQL**, and **AWS**. Proven track record designing **RESTful APIs**, **microservices** architectures, and **CI/CD pipeline** with **JWT-secured, role-based access control**. Experienced with **AWS S3**, SDK-based cloud workflows, and **event-driven** backend patterns. Strong **Agile/Scrum** practitioner with a focus on **performance optimization**, **secure coding** practices, and **unit testing**.

EXPERIENCE

Associate Full-Stack Software Developer — PurpleGrad Technologies Pvt. Ltd., Pune *Sept 2023 – Present*

- Architected **microservices** using **Spring Boot**, **Spring Cloud**, and **Eureka** Service Discovery, exposing **RESTful APIs** secured with **JWT-based role-based access control** across 3 production enterprise applications.
- Engineered **PostgreSQL** database schemas via **Hibernate/JDBC** — authored stored procedures, composite indexes, and **query-optimized** joins, cutting average API response time by -30% under peak ERP load.
- Integrated **AWS S3** and SDK-based backend workflows into production **CI/CD pipeline** for secure, **scalable** document storage across EMR patient records and ERP financial modules.
- Automated **CI/CD pipeline** using Git branching strategies and **Maven** build profiles (dev/test/prod), eliminating manual deployment steps and standardising release cycles.
- Documented **RESTful APIs** with **Swagger/OpenAPI** and generated structured PDF reports via **iTextPDF**, accelerating third-party integration onboarding through self-serve API contracts.
- Applied **secure coding** standards, **unit testing (JUnit 5, Mockito)**, and API validation (Postman) to enforce data protection and maintain 99%+ service reliability across all **microservices**.
- Built responsive **ReactJS** web app (**Tailwind CSS**, **AG-Grid**, **Recharts**) and **React Native** mobile apps (multi-navigator, **Gesture Handler**), consolidating 5+ legacy reporting workflows into a single platform.
- Adopted **Docker** (Basic) for containerised local environments and integrated **event-driven** notification patterns using **Firebase Cloud Messaging** for real-time clinical alerts.

KEY PROJECTS

Enterprise Resource Planning (ERP) System

May 2023 – Present

Stack: Java (Spring Boot 3), PostgreSQL, Hibernate, JWT, Maven CI/CD, ReactJS (Tailwind CSS, AG-Grid, Formik/Yup, Recharts), React Native (Gesture Handler, multi-navigator), iTextPDF, ExcelJS, AWS S3

- Designed and delivered a modular, **scalable** ERP platform covering inventory, finance, HR, and CRM — built on **Spring Boot microservices** with **Hibernate/PostgreSQL**, secured via **JWT**, and deployed via **Maven CI/CD** profiles.
- Engineered a **ReactJS** web dashboard and **React Native** mobile app with gesture-enabled multi-navigator UX, consolidating 5+ legacy workflows and cutting cross-departmental reporting turnaround.
- Implemented PDF/Excel export pipeline (**iTextPDF**, **ExcelJS**) enabling finance teams to generate compliance-ready audit reports on demand.

Electronic Medical Record (EMR) System

-12 months , concurrent

Stack: Java (Spring Boot), Spring Cloud, Eureka Discovery, JWT, Firebase, AWS SDK, PostgreSQL, ReactJS (AG-Grid, Recharts, Axios), React Native

- Built a **HIPAA-aligned**, centralised EMR platform with **Spring Boot microservices**, **Eureka** service discovery, and **JWT-authenticated RESTful APIs**, managing patient records, appointments, and clinical workflows.
- Integrated **Firebase Cloud Messaging** for real-time clinical notifications and **AWS services** for secure backend workflows, reducing appointment scheduling latency.
- Developed a **ReactJS** clinical portal and **React Native** mobile client, standardising data entry across care teams through performance-optimized queries and **AG-Grid** data management.

Asset Management PoC — Bank of Maharashtra

-3 months

Stack: Java (Spring Boot), ReactJS, Tailwind CSS, AG-Grid, PostgreSQL

- Delivered a production-ready web PoC for asset purchase tracking and depreciation management **Spring Boot RESTful API** backend + **ReactJS (AG-Grid, Tailwind CSS)** frontend, replacing manual spreadsheet workflows.

TECHNICAL SKILLS

Core Skills: Java (Spring Boot) . RESTful APIs . Microservices . PostgreSQL . ReactJS . React Native . AWS S3 / SDK . JWT / OAuth2 . CI/CD Pipeline . Docker . JUnit 5 / Mockito . Agile / Scrum . Spring Cloud . Hibernate / JDBC . Swagger / OpenAPI . Git / Maven

Languages: Java, JavaScript, SQL, HTML, CSS

Backend: Spring Boot 3, Spring MVC, Spring Data JPA, Spring Cloud, Eureka Client, Hibernate, JDBC, RESTful APIs, Microservices, JWT (jjwt), AWS SDK, Gson, Jackson, iTextPDF, JAXB, Swagger/OpenAPI

AWS: S3, AWS SDK, CI/CD Integration; familiarity with Lambda, ECS, SQS/SNS, Step Functions, CloudWatch, DynamoDB, CloudFormation, AppSync

Frontend: ReactJS, React Native, Redux, Context API, React Router, Axios, React Query, React Navigation, Gesture Handler, Formik, Tailwind CSS, AG-Grid, Recharts, ExcelJS, pdfMake, Yup

Databases: PostgreSQL, MySQL, Oracle SQL, PL/SQL, DynamoDB (familiarity)

Testing & DevOps: JUnit 5, Mockito, Unit Testing, Integration Testing, Docker (Basic), Git, Maven, Postman, Jira, ClickUp

Concepts: Data Structures & Algorithms, Microservices, Event-Driven Architecture, Serverless (familiarity), Agile/Scrum, SDLC, CI/CD, OOP, Query Optimization, Design Patterns, Role-Based Access Control, Secure Coding Practices, Performance Optimization

EDUCATION

Post Graduate Diploma in Advanced Computing (PG-DAC).

Sept 2022 – Mar 2023

Institute for Advanced Computing and Software Development

Bachelor of Engineering (B.E.).

IPS College of Technology and Management, Gwalior. RGPV University, Bhopal
